

Resellers Wanted

LINEEYE CO., LTD. has been looking for overseas distributors who work between our customers and us. We develop, manufacture and sell protocol analyzers worldwide, which support a wide range of protocols such as RS-232C, RS-422/485, Current loop, I²C, IrDA, CAN/LIN. In addition, we develop USB protocol analyzers as well. LINEEYE series enable you to monitor data between the equipment that use serial communication; PCs, peripheral devices for PC, communication equipment, printers, sequencers, NC machines and robots etc.

LINEEYE series can be used for anything with the development and the testing of communication systems and communication network maintenance. Moreover, these are helpful to support the development and the maintenance of the systems that come with measurement data captured on PC, the systems/programs of the sequencers and the controllers in factories.

Some customers will surely demand these kinds of protocol analyzers which have various functions besides compact B5-sized.

In order to know more about LINEEYE series, visit the content "Product". We are sure that you will have a great deal of interests in becoming our distributors abroad.

Thank you so much.

Sincerely yours,
LINEEYE CO., LTD.
